After an argument with her brother, Thea is mysteriously transported through her smartphone to the magical land of TRON; where technology comes alive, computer viruses are deadly and online trolls are a threat. Along the way, she meets three malfunctioning apps and the four of them travel along the LED Road to seek the help of **The Wonderful Wizard of TRON**, all the while avoiding the nefarious witch Malware.

The Meteor presents **The Wonderful Wizard of TRON**, a funny 21st Century update of the classic children's story, adapted for local kids by Benny Marama and featuring original songs composed by Jeremy Mayall.
