Exploring E-portfolios

Cate Bardwell and Sarah-Jane Saravani
What is an eportfolio?

• “An electronic portfolio, also known as an e-portfolio or digital portfolio, is a collection of electronic evidence assembled and managed by a user, usually on the Web. Such electronic evidence may include inputted text, electronic files, images, multimedia, blog entries, and hyperlinks”.

en.wikipedia.org/wiki/Electronic_portfolio
Types of e-portfolios

- developmental (working),
- reflective (learning)
- representational (showcase).
Usage

- Schools
- Tertiary education
- Continuing professional development
- Job applications
- Assessment
- Accreditation
- Recognition of prior learning
Examples & Evidence

– Tool: www.foliospaces.com
– Example: http://www.foliospaces.com/view/view.php?id=1582 is an example from FolioSpaces
– Video: http://www.youtube.com/watch?v=6B3tujXlbdk
A Case Study from the Hinterlands

TOC

• how it evolved
• what we are doing
• why we are undertaking this
• feedback from a researcher
• where to from here?
MePrints
Just another ECS Blogs weblog

• **MePrints the begining**
• April 20th, 2009 by pm5
• All About MEPrints is a JISC rapid innovations project to build a profile system for the EPrints software. The aim is that a user in the repository will have a page which promotes their identity within the repository. It is hoped this will improve user - repository relations and also provide useful information for user - user interactions.
The Tale So Far

• 2008 - implemented ePrints repository software to enormous acclaim
• 2010 - testing MePrints, enormous acclaim still to come
• The testing question will be “What do you want from an e-Portfolio?”

Feedback from a Hinterlands researcher

- Possibly did not have the full version as the profile edit button was missing from the screen. As an e-portfolio product, MePrints does exactly what is required of it – a space to store and comment on artifacts, move objects in and out, rearrange to provide context, with the ability to set up RSS feeds and to add widgets as required. It does not have the additional capacity that some portfolio software, such as Exabis or Mahara have, of allowing a more social space for invited access, but this is not a necessary feature of an e-portfolio system and is probably done better elsewhere, e.g. FaceBook.

- “However, MePrints does what a "research portfolio" requires (i.e. allows me to display (both by recent and most accessed) my research outputs.”
Aspects for consideration

• What do you want from an e-portfolio – private research development space, shared space with other researchers, public space, social space

• What software to use – open source (MePrints, Exabis), proprietary (Mahara)
Mrs Sarah-Jane Saravani
Learning Hub Manager
Library
Waikato Institute of Technology (Wintec)

Expertise:
- mobile technologies
- metadata
- library management

Biography:
Library manager at Wintec. Interests involve library service delivery to mobile technologies, metadata, library management, emerging technologies and their impact upon libraries.

Qualifications:
- B.A. (Hons) History, University of Otago, 1979 Certificate in Adult Teaching, Waikato Institute of Technology, 2002

Diploma in Library and Information Studies, Victoria University of Wellington, 1991
Whither?

• Promotion across the Hinterland research community
• Demonstration and feedback received
• Customisation undertaken?
• Look at other products, e.g. Greenstone, Mahara
