

Do you know how long it takes a plastic bag to decompose? What's a 'closed' landfill? What effect is the amount of rubbish we are producing having on our environment? How can worms help us in our fight against ever increasing piles of rubbish?

In this book you can learn about what types of rubbish take the longest times to decompose, what we can do to lessen the amount of rubbish we produce, how to recycle effectively and how to make a worm farm.

When you've finished reading about rubbish, take the quiz to see how much you've learned!
